

RESEARCHconnect International Workshop

Dear scientists,

after the successful introduction of RESEARCHconnect International in 2018, we would like to offer the possibility of a half-day **"in-house training"** for all users/new interested parties here at the HMGU.

Wednesday, 27th of February 2019

9:30 am – 12:00pm

Building 33, Großer Hörsaal

RESEARCHconnect International is a dynamic and global online funding service, which helps universities and research institutions in finding funding opportunities. Users have access to a various number of tools such as the set-up of automatic funding alerts or the possibility to set up workgroups.

With over 30 years of experience, the funding tool offers a customer friendly and time efficient system, in which information can easily be shared and disseminated.

In a hands-on workshop, Alexander Nehm, Business Development Manager for IDOX Germany, will demonstrate you the features and possibilities of RESEARCHconnect International.

If you wish to attend, please get registered by sending an e-mail to Birgit Merz, SPR at birgit.merz@helmholtz-muenchen.de
