

18.02.20

Translational Medicine Seminar Series

Being comfortable with the unknown

Speaker: Dr. Andrea Bandelli (Science Gallery International, Dublin)
Chair: Dr. Astrid Lunkes (Epigenetics@HMGU)
Date: 18.02.20
Place: Neuherberg, Building 23, Auditorium
Schedule: 3:30 – 5:00 pm

This seminar series aims to give an overview on translational medicine starting from the disease towards the understanding of disease mechanisms, epidemiological evidence, identification of biomarkers and development of new therapies and drugs leading to clinical studies. It will also cover basic concepts in life science ranging from research ethics, good manufacturing practice, translation of knowledge from mice to men, data

integration to the transfer of research to the clinics and industry. Basis researchers, physician scientists and clinicians will introduce challenges and success stories of translational research and the format of a 45 minute talk followed by "Snacks & Drinks" will provide a platform for active discussions and networking. The lecture series welcomes all researchers of the Center and is an integral part of the HELENA
